

# History

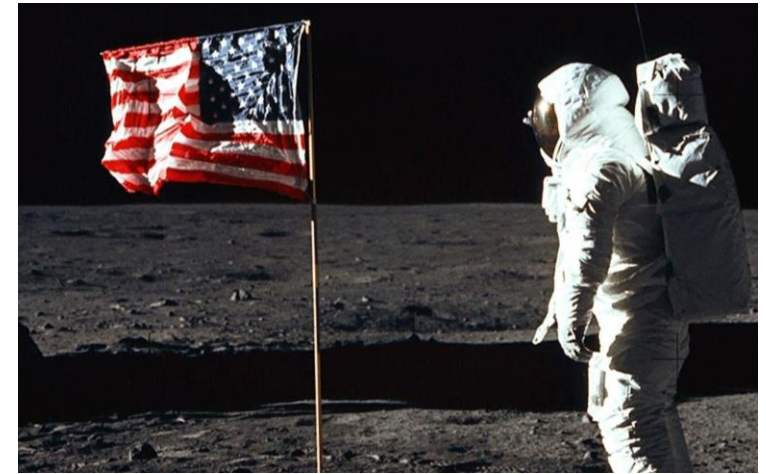

# What is History?

In History, we learn about **the past.**

Can you share something that has happened in the past in your life?

# Historians ask questions such as....

What was it like to live a long time ago?

What caused events like the Great Fire of London?

Why are some people remembered as important?

# How do we find out about the past?

Historians examine evidence (sources) to find out more about the past.

This is especially important to find out about things that happened before we had cameras and technology.
